

Treatment Planning Report

Patient Name: Vishwakrit Choradia

Date: 11/01/2024

Treating Doctor: Dr.Vikee Singh

Case ID: 2401071894

Categorisation of Case: DA50 {Standard}

Active Aligners: U/28, L/20

Chief Complaint:

As per the prescription form, patient complains of anterior correction.

Treatment Plan:

In the upper arch, spaces obtained from posterior expansion and interproximal reduction of 0.6mm per contact irt 16-15,15-14, 14-13, 23-24, 24-25, 25-26; 0.4mm per contact irt 21-22 and 22-23 will be utilized to align, intrude and retract the upper anteriors.

In the lower arch, spaces obtained from posterior expansion and interproximal reduction of 0.4mm per contact irt 31-41 and 42-43; 0.2mm per contact irt 41-42 will be utilized to align, intrude and retract the lower anteriors.

Note: -

Kindly use IPR strips or IPR burs to perform above said 0.6mm IPRs and kindly use only handstrips to perform above said 0.4mm and 0.2mm IPRs. Attachments may vary during the course of treatment. It is recommended to have proper follow-ups, periodic assessments and records of the case. Kindly provide us your valuable comments on our customised treatment software- "Digiplan". Your comments will be appreciated.
